

FOR IMMEDIATE RELEASE

Wegener Corporation To Be Acquired by Novra Technologies, Inc.

Merger signals industry consolidation for radio, datacasting, and digital signage solutions

(February 5, 2014) – Johns Creek, Georgia - Wegener Corporation (OTC Pink: WGNR), a provider of products for television, audio and data distribution networks worldwide, today announced that it will be acquired by Novra Technologies, Inc. in an all stock transaction. This transaction is subject to Novra's due diligence, the approval of Wegener Corporation shareholders, and other terms and conditions. Wegener Corporation previously announced that the Board of Directors had unanimously approved a Term Sheet for the acquisition. Novra Technologies, Inc. will also acquire privately held Westport Research Associates, Inc. of Raytown, MO.

“This acquisition represents an exciting improvement for Wegener Corporation and its customers. There are product synergies with very little overlap that strengthen and broaden the offerings of the combined companies,” stated Troy Woodbury, President and CEO of Wegener Corporation. “Being part of the combined companies will improve Wegener Corporation's financial stability while strengthening the company's management in all aspects of its operations including sales and marketing, engineering, and production.

“Joining this new organization represents the end of a difficult financial period for Wegener Corporation and will renew the confidence of our customers, shareholders, employees, and our creditors,” continued Mr. Woodbury. “We are working on major projects in Latin America and we believe real progress will be made in the domestic digital signage market during fiscal 2014. Strong improvements have been made in channel partners and digital signage product capability. We are encouraged by the opportunities in the future.”

“The product portfolio of the combined companies will provide a powerful suite of capabilities for large-scale networks in radio broadcasting, business music, broadcast video, digital signage and IP-TV” stated Harris Liontas, President and CEO of Novra Technologies, Inc. “Wegener Corporation and Westport Research Associates, Inc. are not just simple acquisitions but a merger allowing for the creation of a solutions-based provider that will offer clients a broader scope of reliable products and services, strong network control systems, creative solutions to network communication issues, deeper access to engineering services and reliable cost effective end-to-end solutions.”

“Representing the first step in Novra Technologies' strategic vision to combine companies with strong product line, broad install base and operational synergies, these acquisitions are expected to be completed in the first or second quarter of 2014.”

About Novra Technologies, Inc.

Novra Technologies offers premium products and solutions to the datacasting and digital signage markets. Novra specializes in the transmission and reception of IP traffic over satellite, cable and terrestrial communication links. Products offered include broadband receivers for DVB-S, DVB-

S2, DVB-C, and ATSC systems. Novra's IPE encapsulator products can be used in both DVB and ATSC MPEG2 systems for datacasting as well as broadband access applications. The NovraLink digital signage solution integrates Novra's technologies into a comprehensive multimedia management and distribution system.

Based in Winnipeg, Manitoba, Canada, Novra Technologies, Inc. is listed on the TSX Venture Exchange under the symbol NVI.V. For detailed trading information select TSX:NVI.V

About Westport Research Associates, Inc.

Westport Research is privately held and provides custom and innovative solutions to move and manage media assets for background music, digital signage, weather, broadcast radio, and movie theaters.
