

Novra Announces Launch of Conditional Access DVB-S2 Receiver

Novra is pleased to announce that the S200CA receiver, its newest DVB-S2 satellite receiver, is now in full production and commercially available.

The S200CA delivers all the functions and features of the previously released S200 receiver, plus an added DVB-compliant conditional access Common Interface (DVB-CI) slot. The DVB-CI slot provides cost-effective compatibility with the vast majority of DVB conditional access systems.

The S200CA is ideally suited as a video aggregation point for an IPTV network where distribution over LAN is desired and content is scrambled with a DVB conditional access system. The S200CA is typically deployed along-side the S200-Pro in the head-end for networks such as: hotel or cruise-ship infotainment, IPTV service or cable TV.

The following features are common on all models in the S200 family:

- DVB-S and DVB-S2 Compliant
- DVB-S Demodulation:
 - QPSK (DVB-S) up to 45 Msps @ 7/8 FEC
- DVB-S2 Demodulation
 - QPSK up to 45 Msps @ 8/9 FEC
 - 8PSK up to 30 Msps @ 9/10 FEC
- Up to 80 Mbps Sustained Throughput
- RJ45 10/100BaseT Ethernet Interface
- IGMP Support
- Compact Form Factor

For a full description of the S200CA receiver, see the product brochure available from http://novra.com/Website/Novra_Products_S200_DVB-S2_IPTV.html.

About Novra Technologies Inc.
www.novra.com

Novra Technologies offers premium products and solutions to the datacasting and digital signage markets. Novra specializes in the transmission and reception of IP traffic over satellite, cable and terrestrial communication links. Products offered include broadband receivers for DVB-S, DVB-S2, DVB-C, and ATSC systems. Novra's IPE encapsulator products can be used in both DVB and ATSC MPEG2 systems for datacasting as well as broadband access applications. The NovraLink digital signage solution integrates Novra's technologies into a comprehensive multimedia management and distribution system.
